SUMMARY

Fullstack Developer specializing in Backend Development, experienced in using Laravel, Golang, and ReactJS to develop REST APIs and data-driven systems. Lead author of a Sinta 3 accredited journal publication on applying Random Forest and XGBoost to esports match outcome prediction. Experienced in integrating payment gateways such as Midtrans and Xendit, as well as Hugging Face AI models, into an energy recommendation chatbot project, with a focus on building scalable and production-ready backend systems.

EXPERIENCE

MBKM Magang dan Studi Independen Bersertifikat Batch 7, Ruangguru CAMP Sep - Dec 2024

Fullstack Software Engineer Trainee

- Completed Ruangguru's Certified Independent Study Program in Fullstack Golang & AI, covering Golang, REST APIs, ReactJS, SQL/NoSQL databases, and machine learning integration, graduating with a perfect GPA of 4.00/4.00.
- Independently designed and developed an AI-powered energy recommendation chatbot as the program's capstone project using Golang, ReactJS, and a machine learning model.

CV. Mekar Cutting Digital, Purbalingga May 2022 – Dec 2023

Freelance Software Developer

- Developed product catalog websites using Laravel, including a multi-brand catalog with a 3-person development team and a retail storefront for SMKN 1 Purbalingga.
- Developed a desktop POS and inventory management system for a pharmacy using NetBeans, Java, JDBC, and MySQL, covering sales, stock management, suppliers, and item search.

PT Sekawan Global Komunika, Banyumas Jun – Aug 2021

Internship

- Built an Android attendance app (Java, PHP REST API, MySQL) with auth, password recovery, geofence-validated check-in/out, field duty attendance, and photo upload.
- Built the web admin dashboard to configure attendance radius and manage users or records.

EDUCATION

Universitas Amikom Purwokerto, Banyumas Sep 2022 – Feb 2026

Bachelor of Computer (BC / S.Kom.), Informatics

GPA 3.79 / 4.00, Cumlaude

Thesis completed via scientific article conversion pathway, published in a Sinta 3-accredited journal.

SMKN 1 Purbalingga, Purbalingga Jun 2019 – Jun 2022

Software Engineering (Rekayasa Perangkat Lunak)

PROJECTS

Laravel Ecommerce API headless

[Github](#) | Laravel, PostgreSQL, Redis

- Built a headless REST API (Laravel, PostgreSQL, Redis) covering product and order management with Midtrans integration, and seller endpoints.
- Implemented role-based access via custom middleware with OR-based permission logic across customer, seller, and admin roles.
- Built custom Node.js tooling to auto-generate and validate Postman collections from an OpenAPI spec.

Food Order App

[Github](#) | ReactJS, Laravel, Pusher, Xendit

- Built a real-time food ordering system (React, Laravel) with QR-based table access.
- Synced order status in real time via Pusher event-driven updates.
- Integrated Xendit payment gateway with webhook-based status confirmation.

Chatbot for Recommendation & Management Energy

[Github](#) | Golang, ReactJS, HuggingFace

- Built an AI-powered energy recommendation chatbot using Golang and ReactJS, analyzing uploaded CSV consumption data with Hugging Face TAPAS for table question answering and Phi-3.5-mini-instruct for conversational recommendations.
- Designed a RESTful API with auth and PostgreSQL for session/chat data management.
- Built a responsive React frontend with auth and theme support.

PUBLICATION

Match Outcome Prediction in Draft Pick and In-game Phases of MSC 2025 Mobile Legends using Random Forest and XGBoost (1st Author)

Dec 2025

JAIC (Journal of Applied Informatics and Computing), Sinta 3-accredited

[DOI](#) | [Github](#) | Python, Scikit-learn, XGBoost, Random Forest

- Designed a feature engineering pipeline using esports match statistics and replay data, incorporating draft pick compositions and in-game statistical snapshots.
- Evaluated Random Forest and XGBoost for in-game snapshot match outcome prediction, achieving 88% accuracy and a 0.94 ROC-AUC, compared to 57% using draft pick features alone.

SKILLS

- Programming Languages: PHP, Go, JavaScript, Python
- Frameworks & Libraries: Laravel, ReactJS, Flutter, Tailwind CSS,
- Database & Caching: PostgreSQL, MySQL, Redis
- DevOps & Tools: Git, Postman, OpenAPI/Swagger, Node.js
- Machine Learning: Scikit-learn, XGBoost, Random Forest
- Payment & Real-time APIs: Midtrans, Xendit, Pusher

LANGUAGES

- Bahasa Indonesia: Native
- English: Professional Working Proficiency
